HEARING RESEARCH

Vol. 157, Nos. 1–2
July 2001

CONTENTS

Cited in: Biological Abstracts (BIOSIS); Chemical Abstracts; Current Contents/Life Sciences; Current Awareness in Biological Sciences (CABS); Excerpta Medica (EMBASE); Index Medicus; INSPEC; PASCAL M; Reference Update; Full text available in ScienceDirect® and Neuroscion

Review

J.J. Eggermont (Canada)
Between sound and perception: reviewing the search for a neural code 1

Research Papers

C. Ågrup, P.-O. Berggren and D. Bagger-Sjöbäck (Sweden)
Morphological and functional characteristics of cells cultured from the endolymphatic sac 43

G.M. Gerken, P.S. Hesse and J.J. Wiorkowski (USA)
Auditory evoked responses in control subjects and in patients with problem-tinnitus 52

V. Tsuprun and P. Santi (USA)
Proteoglycan arrays in the cochlear basement membrane 65

A.W. Scholtz, K. Kammen-Jolly, E. Felder, B. Hussl, H. Rask-Andersen and A. Schrott-Fischer (Austria, Sweden)
Selective aspects of human pathology in high-tone hearing loss of the aging inner ear 77

A.E. Stenberg, H. Wang, J. Fish III, A. Schrott-Fischer, L. Sahlin and M. Hultcrantz (Austria, Sweden)
Estrogen receptors in the normal adult and developing human inner ear and in Turner's syndrome 87

E.M. Keithley, B. Harris, K. Desai, F. Linthicum and N. Fischel-Ghodsian (USA)
Mitochondrial cytochrome oxidase immunolabeling in aged human temporal bones 93

M.T. Henzl, J. O'Neal, R. Killick, I. Thalmann and R. Thalmann (UK, USA)
OCP1, an F-box protein, co-localizes with OCP2/SKP1 in the cochlear epithelial gap junction region 100

G.B. Liu and R.F. Mark (Australia)
Functional development of the inferior colliculus (IC) and its relationship with the auditory brainstem response (ABR) in the tammar wallaby (*Macropus eugenii*) 112

J.J.J. Dirckx and W.F. Decraemer (Belgium)
Effect of middle ear components on eardrum quasi-static deformation 124

R.S. Heffner, G. Koay and H.E. Heffner (USA)
Audiograms of five species of rodents: implications for the evolution of hearing and the perception of pitch 138
